FOR IMMEDIATE RELEASE

Mark Cohen's forthcoming book "Groundwork," published by Super Labo (Tokyo) presents Cohen's reactions to the postmodern world. With the rise of non-stop satellite images, "big data," and endless interconnected computer networks, Groundwork reminds us that objects and events at the street level – in their grittiness, poverty and inconspicuousness – are an important set of evidence about the world today. The set of images in this volume (many created since Cohen took up residence in Philadelphia) are a subjective catalog of the street surface that become a commentary on our post-modern world.

Pack Matches (2017)

Groundwork is Cohen's third book from Super Labo, and will be available at the publisher's website: <https://superlabo.com/> in April 2024.

Cohen and Super Labo will appear at the New York Art Book Fair next month in New York City.
